

Did You Know?

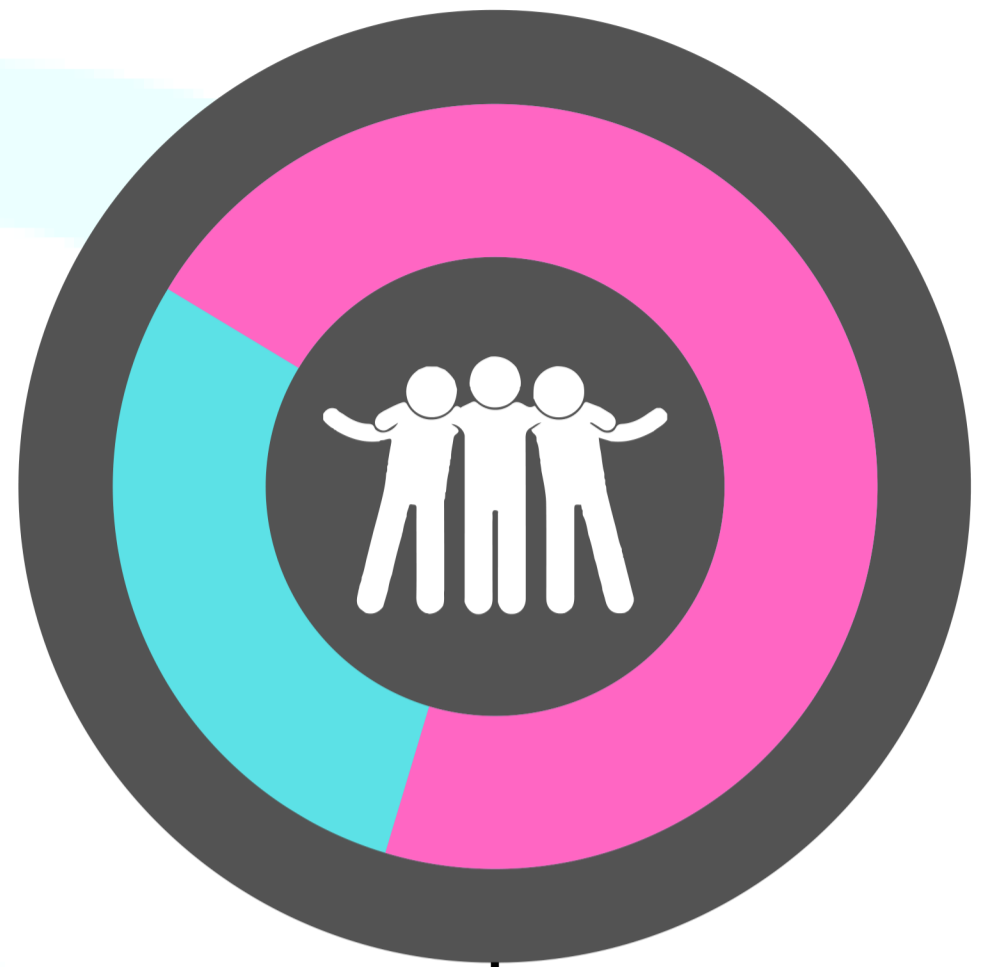

Spiking is not Just a Female Problem!

Our results found that 16.5% of female and 12.3% of male students had been spiked. Women are at a greater risk but men can and do get spiked as well.

Victims Could be Better Looked After!

85.5% of victims were not satisfied with how much help venues offered them.

Spiking Affects us All!

Do you know someone who has been spiked?
Chances are you do with over 70% of us having had a friend who has been spiked.

We Could Feel Safer!

When asked to rate how safe they feel on a night out in Lancaster; the average female student gave a score of 6.1/10 and the average male student gave a score of 7.7/10. Not low, but not great.

All results are from a study conducted by us on Lancaster University's campus with a sample of 151 students
